STATUS OF CTA

CTA CONSORTIUM

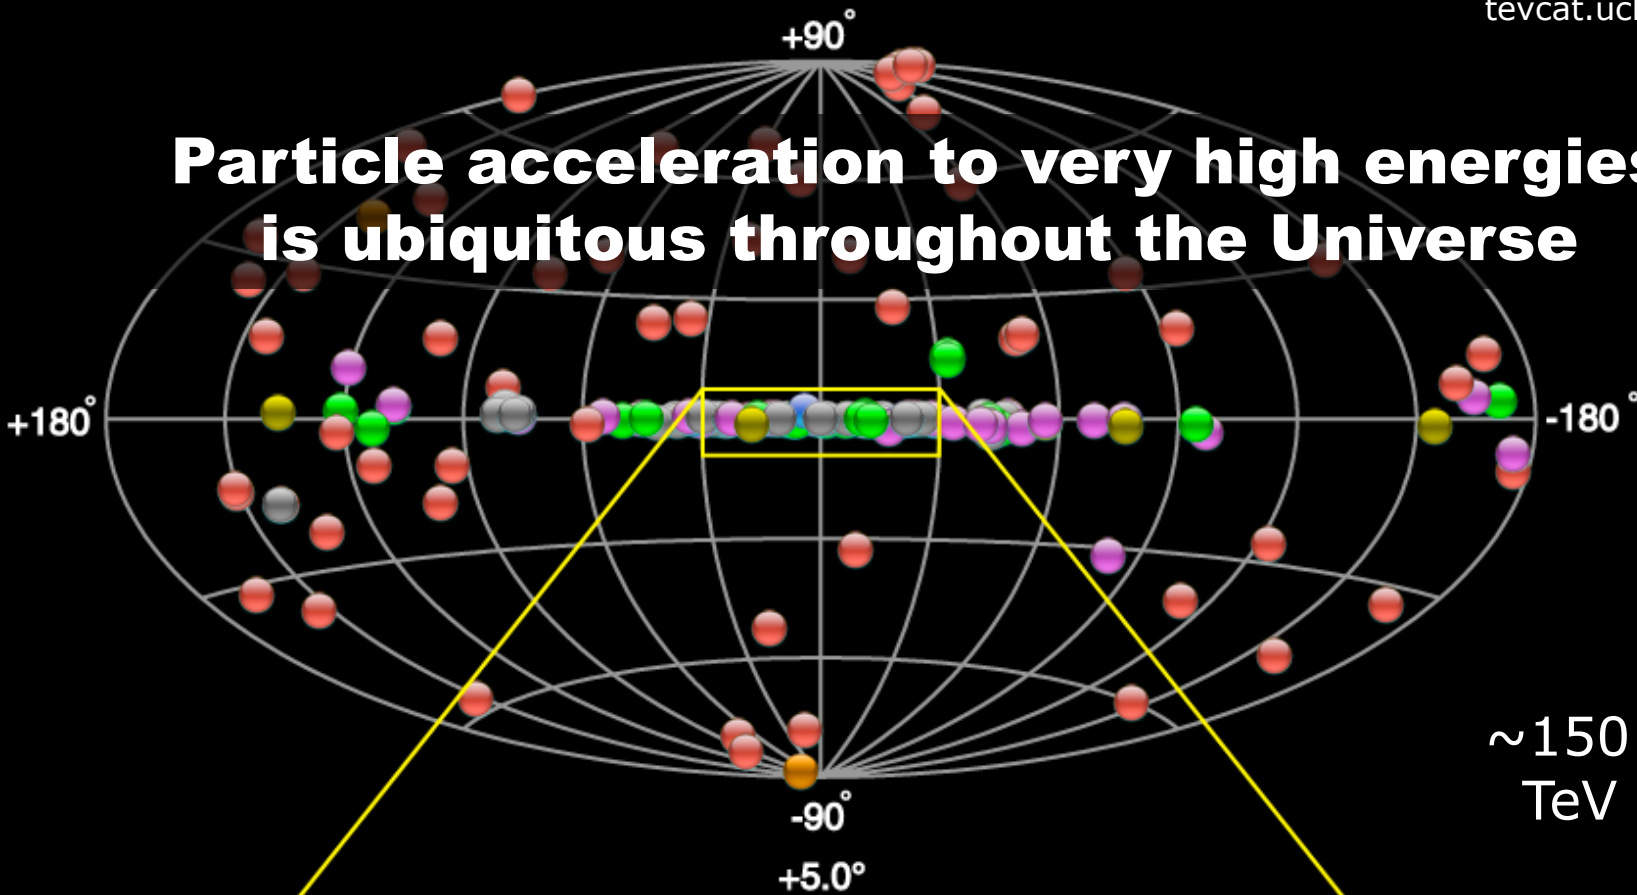

5 continents
28 countries
80 parties
173 institutes
1138 members

CTA scientists

Particle acceleration to very high energies is ubiquitous throughout the Universe

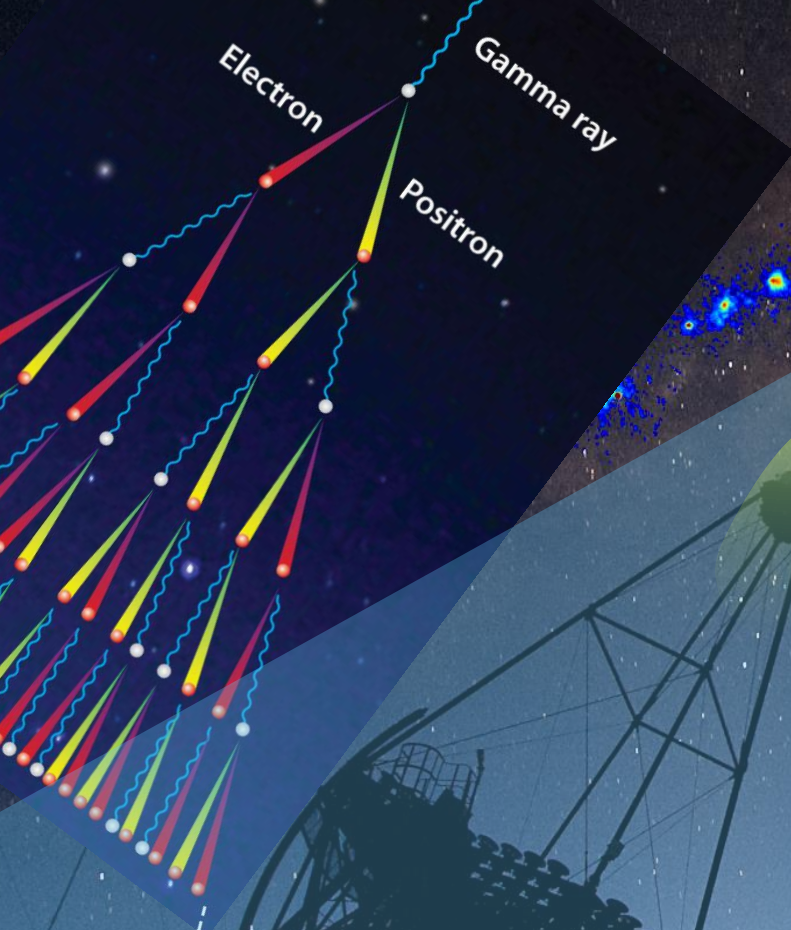

~150 known TeV sources

- PWN
- Starburst
- HBL, IBL, FRI, FSRQ, LBL, AGN (unknown type)
- Globular Cluster, Star Forming Region, uQuasar, Cat. Var., Massive Star Cluster, BIN, BL Lac (class unclear), WR
- Shell, SNR/Molec. Cloud, Composite SNR
- DARK, UNID, Other
- Binary, XRB, PSR, Gamma BIN

The TeV sky

HOW?

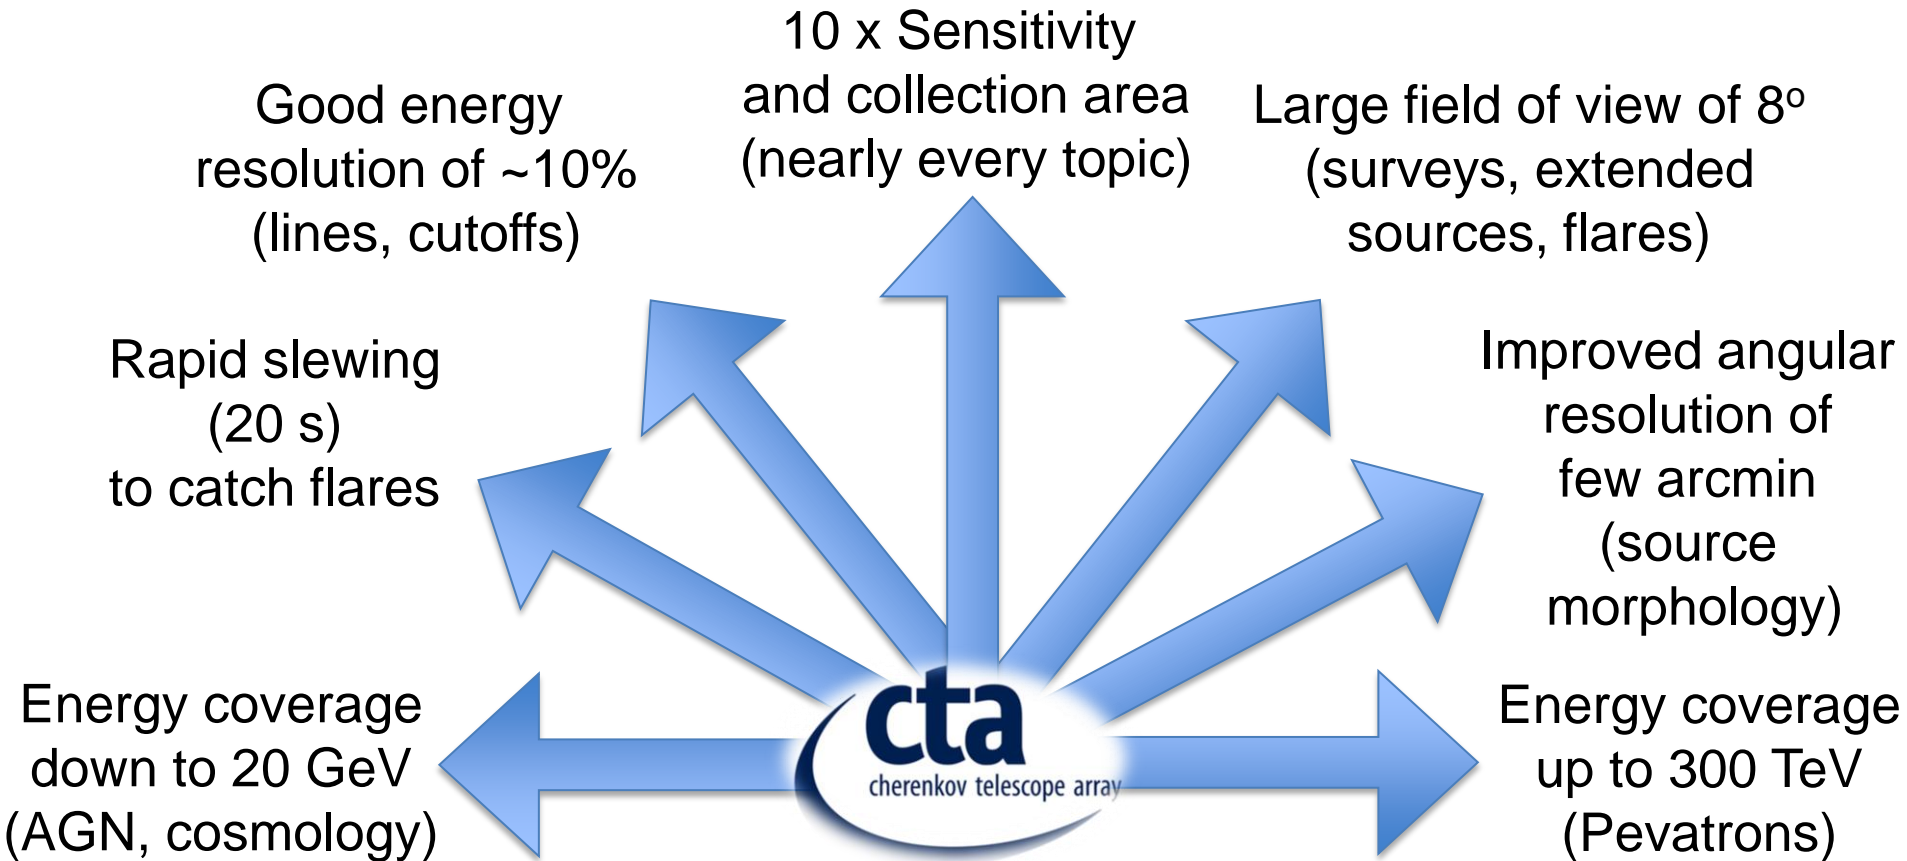

DIFFERENTIAL FLUX SENSITIVITY

Hinton & Funk
arXiv:1205.0832

REQUIREMENTS & DRIVERS

FROM CURRENT ARRAYS TO CTA

Science-optimization under budget constraints:

- Low-energy γ high γ -ray rate, low light yield
→ require small ground area, large mirror area
- High-energy γ low γ -rate, high light yield
→ require large ground area, small mirror area

SOUTHERN AND NORTHERN SITES

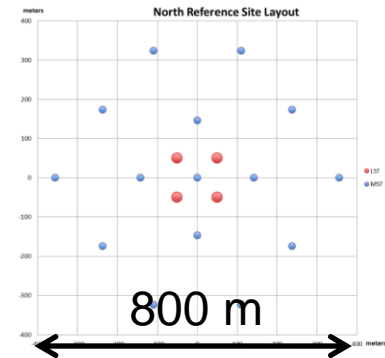

South site

- 4 large LST (20-200 GeV)
- 25 medium MST (200 GeV-5 TeV)
- 28 medium SCT expansion (US)
- 70 small SST (5 TeV – 300 TeV)

North site

- 4 large LST
- 15 medium MST

~2/3 of all current sources
in Southern sky

SENSITIVITY (IN UNITS OF CRAB FLUX) FOR DETECTION IN EACH 0.2-DECADE ENERGY BAND

cta
cherenkov telescope array

Theme 1: Cosmic Particle Acceleration

- How and where are particles accelerated?
- How do they propagate?
- What is their impact on the environment?

Theme 2: Probing Extreme Environments

- Processes close to neutron stars and black holes?
- Processes in relativistic jets, winds and explosions?
- Exploring cosmic voids

Theme 3: Physics Frontiers – beyond the SM

- What is the nature of Dark Matter? How is it distributed?
- Is the speed of light a constant for high energy photons?
- Do axion-like particles exist?

CTA SCHEDULING

Monitoring
4 telescopes

PeV Deep Field
using SSTs

GeV observations
using LSTs

TeV
survey
using
MSTs

Large zenith angle
observations from
other hemisphere

Monitoring
1 telescope

- CTA North and South through single portal, AO, identical tools
- Queue mode scheduler taking into account actual sky conditions, sub-arrays & conditions requested in proposal, priorities, TOO's

SHARING OF OBSERVATION TIME

Example; sharing will be time dependent

- Open time: open to participating countries (?)
- Archival data: fully open, 1yr proprietary time (?)

CTA TELESCOPES

LARGE TELESCOPE (LST)

23 m diameter
389 m² dish area
28 m focal length
1.5 m mirror facets

4.5° field of view
0.1° pixels
Camera \varnothing over 2 m

Carbon-fibre structure
for 20 s positioning

Active mirror control

4 LSTs on South site
4 LSTs on North site
Prototype = 1st telescope

MEDIUM-SIZED 12 M TELESCOPE

OPTIMIZED FOR THE 100 GEV TO ~10 TEV RANGE

100 m² dish area
16 m focal length
1.2 m mirror facets

8° field of view
~2000 x 0.18° pixels

25 MSTs on South site
15 MSTs on North site

Berlin
MST prototype
operational

MST PROTOTYPE

SST - OPTIMIZED FOR THE RANGE ABOVE 10 TEV

ASTRI DUAL MIRROR SST

ASTRI
Si camera
module using
S&H ASIC
(CITIROC)

Prototype
under
construction, to
be deployed at
Serra
La Nave,
Sicily

Primary mirror
facets

GATE DUAL MIRROR SST

Prototype under construction at Paris, ASTRI/GATE merge towards common design in progress

SINGLE-MIRROR PROTOTYPE SST

IMPLEMENTATION

Prototypes

- MST @ Berlin
- SST-1M @ Cracow, SST-2M @ Sicily, Paris

Pre-production telescopes:

- to verify mass production and deployment
- “Mini-arrays” at final sites, used in final arrays
- 1 LST
- ~3 MSTs
- ~5 SST-1M
- ~5 SST-2M

Mass production and deployment

**CHALLENGE:
HANDLING CTA DATA**

PROCESSING NEEDS

Peak number of CPU cores needs (2013 CPU performances)

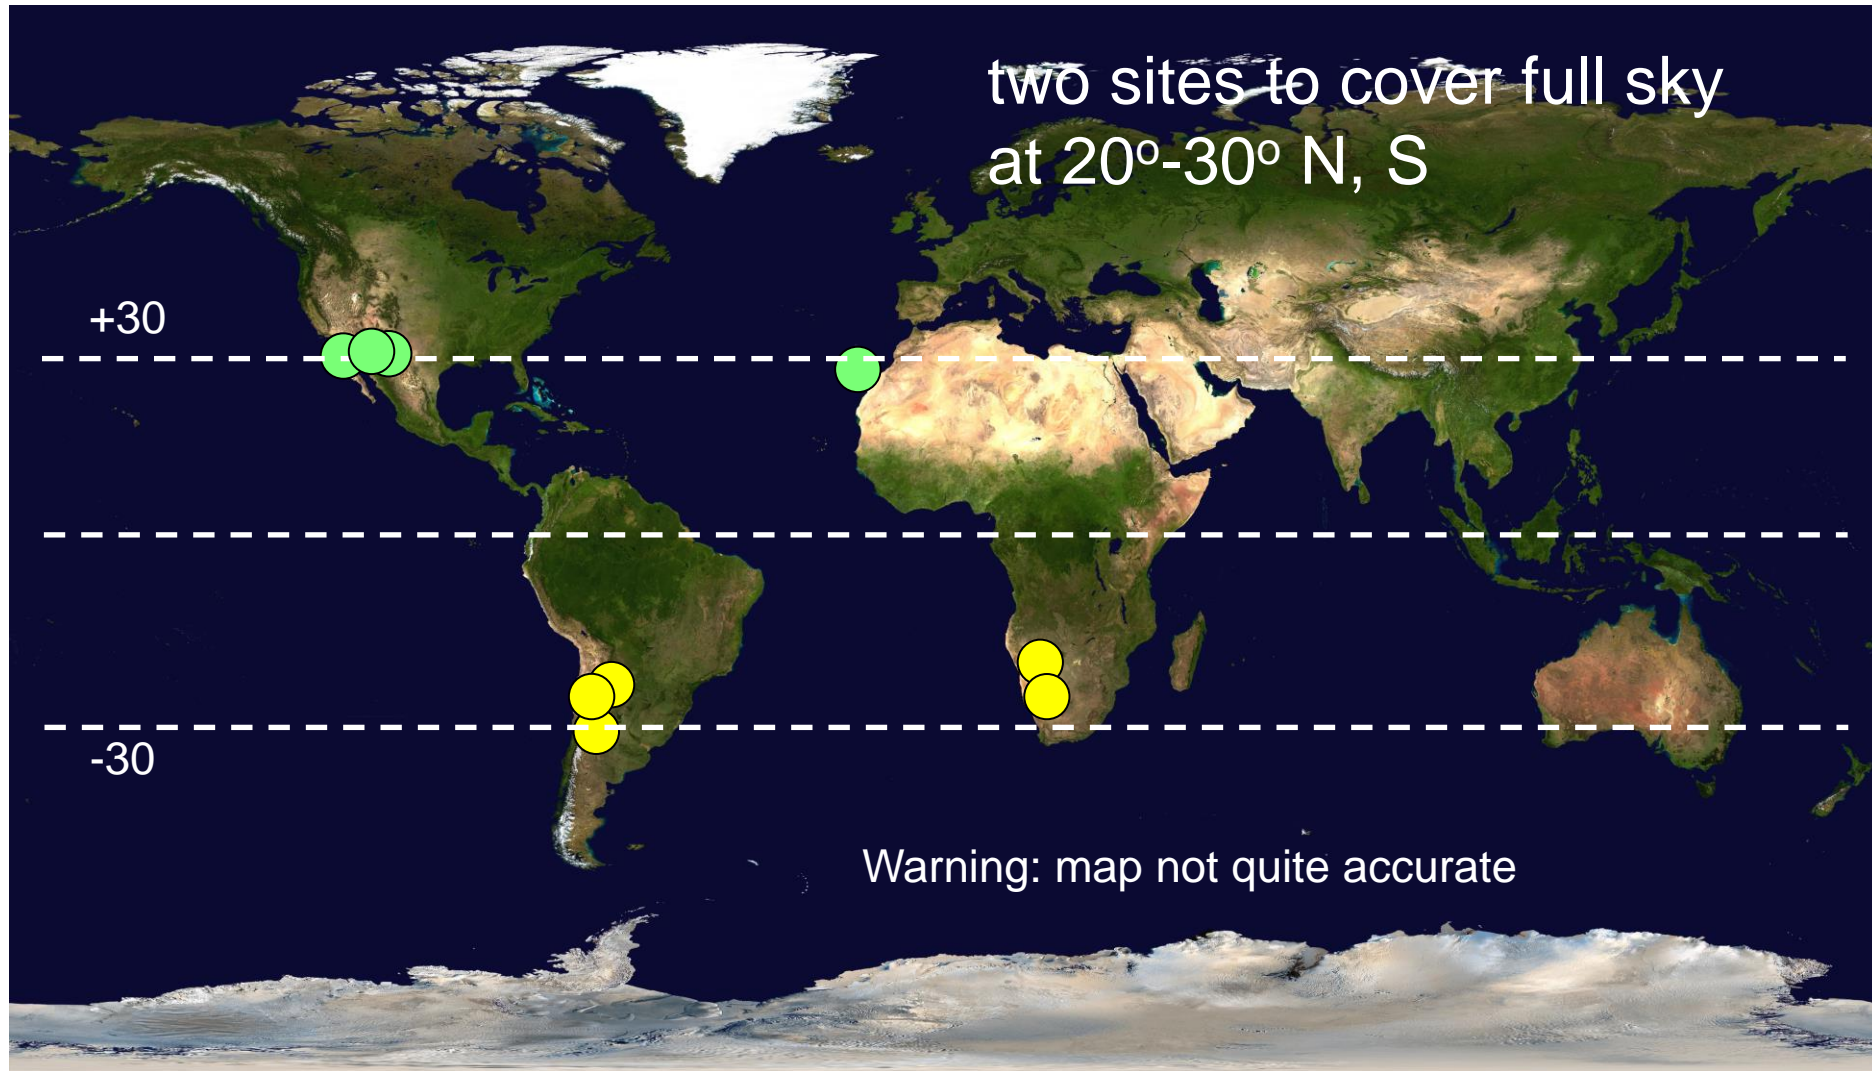

STORAGE CAPACITY

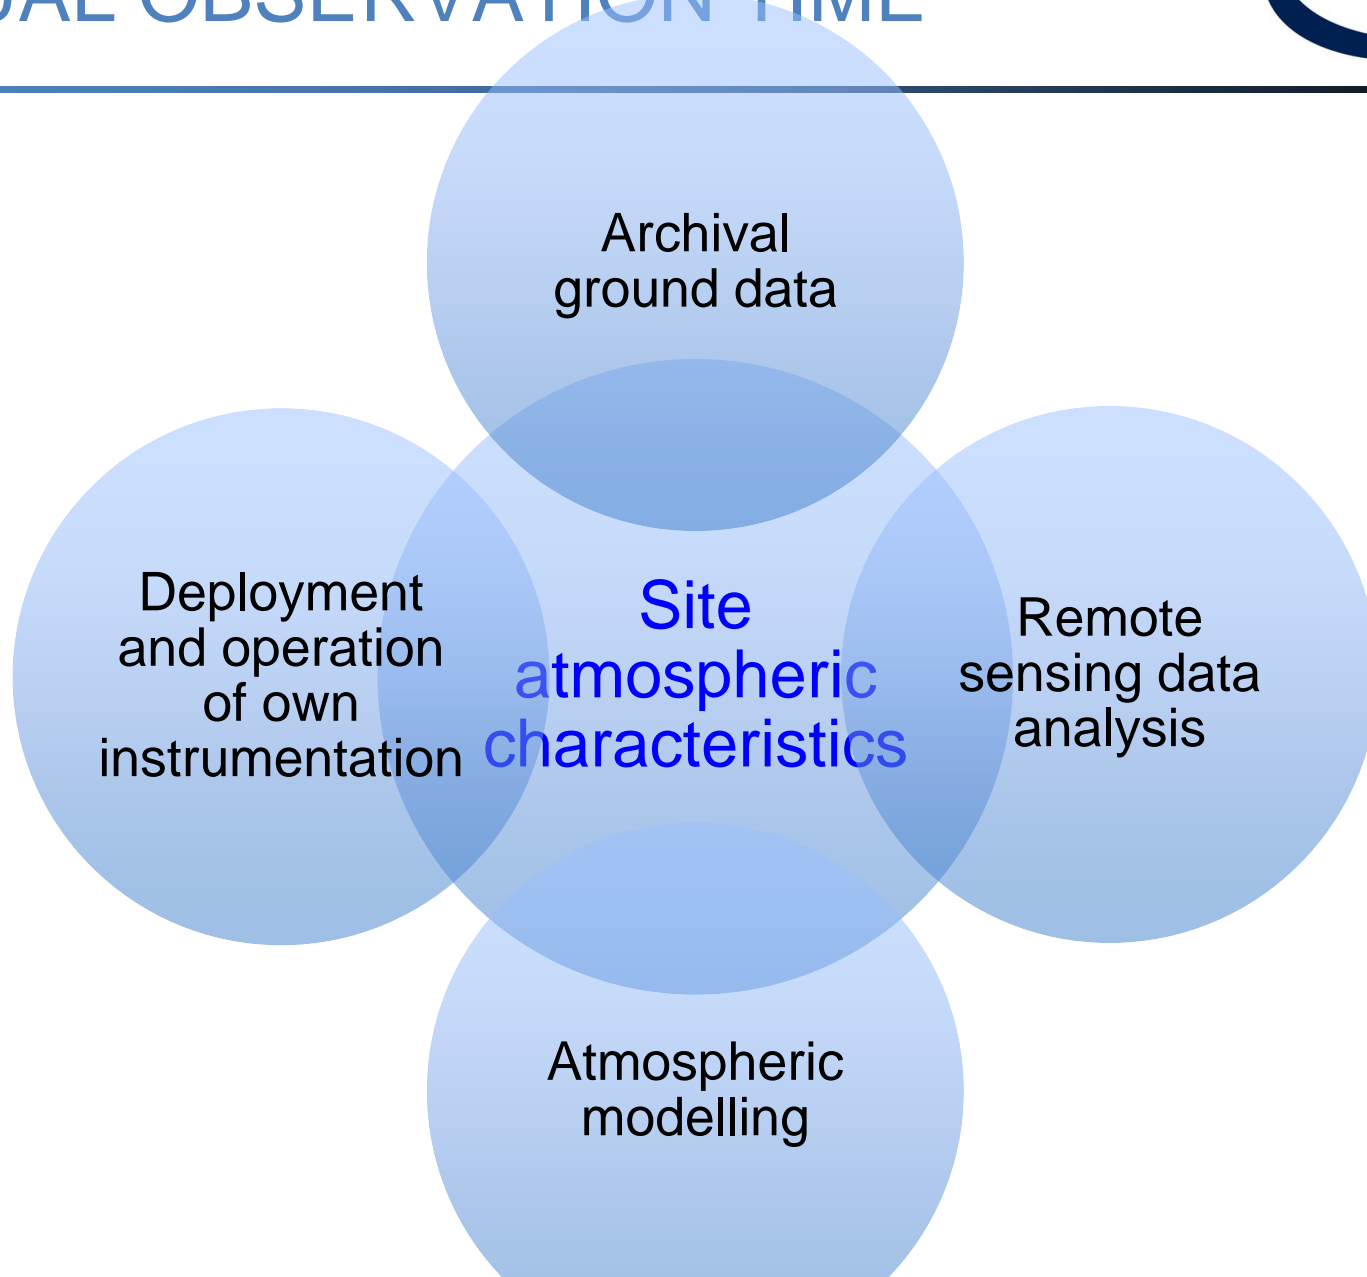

CTA SITE SELECTION

SITE SELECTION

IMPORTANT CRITERION: ANNUAL OBSERVATION TIME

AVERAGE ANNUAL OBSERVATION TIME

PROCESS

CTA PP site evaluation

CTA scientific site ranking

Sept 2013

Site Selection
Committee ranking
and recommendation

Mar. 2014

Resource Board
selection of sites for
negotiations

April 2014

South: start the negotiations for **Aar/Namibia and ESO/Chile**, keeping Leoncito/Argentina as a third option.

North: postponed

Site negotiations

Final site selection
